48TH PRESIDENTIAL ADDRESS DELIVERED

The 48th President of the Ghana Institution of Engineers, first female President of the Institution, Ing. Mrs. Carlien Bou-Chedid, has delivered her Presidential Address to members of the Ghana Institution of Engineers (GhIE) on Thursday, 16th November, 2017 at the Engineers Centre, Roman Ridge, Accra.

Her Address was under the topic: "Sustainable Development: An Illusion without Disaster Risk Management". Ing. Mrs. Carlien Bou-Chedid, who is a Consulting Structural Engineer with over 30 years of experience, said that "some of

the hazards that Ghana faces have caused considerable losses in other countries. They have set these countries back considerably in their development". She therefore advised that the management of Disaster Risk must be elevated to the highest level in our infrastructure delivery process else, we risk creating an illusion of development that can be wiped out in a single catastrophic event.

The President of Ghana Institution of Engineers (GhIE), Ing. Mrs Carlien Bou-Chedid, FGhIE

GhIE IS 50 YEARS
