

GhIE

GHANA INSTITUTION OF ENGINEERING

June 29, 2023

Dear Members,

Member Update: June 2023

Permit me to bring the following events to your attention:

1. 202 Professional Engineers, 4 Professional Engineering Technologists and 1 Engineering Technician were inducted on June 27, 2023. Congratulations to our new full members.
2. We did not receive nominations for the positions of Chair for Branch 4 (Greater Accra), Executive Representatives for Technologists, National Councillors for Technologists, and National Councillors for Technicians when the Notice for Bye-Election was issued on May 10, 2023. Consequently, no By-Election was conducted.
3. Committees have been formed and have begun their work. Please refer to Table A for the Committee Chairs' contact information. For each Committee, we are also establishing a pool of resource individuals called Friends of Committees. The Friends of Committees would consist of individuals with experience and an interest in the work of Committees; they may be called upon from time to time for assistance. In Table A, we've also included links for joining Friends of Committees.
4. The Technical Division Operations Committees have been established, and Sub-Division Chairs have been elected. Table B provides information about the Technical Divisions' leadership. The Technical Divisions will be responsible for drafting most of our position papers, among others.
5. Congratulations to Branch 1 for establishing a new Chapter in Obuasi. The President and some Executive Committee members attended this event.

6. As you may be aware, the nation has experienced six (6) building collapses since my last update. In accordance with our responsibilities to uphold Professional Standards in the practice of engineering and to provide Civic Service, we have taken a keen interest in this matter. The incidents are being investigated in conjunction with the Engineering Council (EC) and the Built Environment Professional Forum. Based on the findings of the investigations, we will communicate our position on the matter. This would be part of our efforts to assure the responsiveness of Disaster Management Preparedness. These incidents plainly demonstrated our lack of sufficient responsiveness to disasters as a country.
7. In accordance with Article 7 of the Constitution and Bye-laws, the Forum for Engineering Educational Units and the Forum for Engineering Service Providers have been established, and their respective leadership has been elected. We urge all engineering educational institutions and engineering service providers to collaborate and participate actively in these forums. The leadership of the forums is displayed in Table C.
8. The EC has published a list of Professional Engineering practitioners who are licensed to practice this year. This list does not include Professional Engineering practitioners who were not in good standing as at February 2023. A supplementary list is expected to be published by the end of July 2023. We urge members who are not in good standing to do so to comply with national laws. Immediate or prospective repercussions may result from practicing without a valid license.

We look forward to your continued support of our institution.

Sincerely,

Ing. Nyante, David K. FGhIE
Executive Director

Encl.
